Conroy discovers further gold targets

Armagh: Conroy Gold and Natural Resources — which has discovered a 30-mile (48-km) gold trend running across Armagh, Monaghan, and Cavan — said a series of further gold targets have been identified along the gold trend.

This follows an independent review of the airborne geophysics data in the area by BRG (Geotechnics) Ltd.

Conroy is also planning to develop its first operational gold mine at Clontibret in Co Monaghan.
